

- 1 Pumping stations equipped with comminutors
- 2 Inlet chambers with mechanically cleaned racks
- 3 Primary aerator and sand trap
- 4 Primary aerator and grease separator
- 5 Primary sedimentation tanks with rotating scraper
- 6 Main measuring duct of the Venturi type
- 7 Aeration tanks
- 8 Secondary sedimentation tanks
- 9 Sewage pumping station
- 10 Receiver — Öresund
- 11 Sludge densifiers
- 12 Digestion chambers
- 13 Pumping station for digested sludge
- 14 Tank for digested sludge
- 15 Gas tanks
- 16 Power station
- 17 Chlorination station
- 18 Main building with control room, laboratory, staff rooms etc.
- 19 Re-aeration for excess sludge
- 20 Pilot plant
